concerns about this portion of the fund transfer. But we certainly do want to get the veterans home funds transferred. Would it make sense, as you suggested, to advance the bill to Select File, give us some additional time, rather than hurriedly craft an amendment, or split them out and try and do something, to just advance the bill today with the understanding that we would be looking at it between now and Select File, and may have an amendment at that time to remove that portion of the bill? So this would give us a little more time, rather than to try and do something in a hurry and make some mistakes, not fully correct the problem anyway, as Senator Bromm said, and then have to still do something on Select File. So I would make that suggestion, hope that we could advance everything as it is to
